

CHAPTER V

CONCLUSION AND SUGGESSTON

This chapter consist of conclusion and suggest and the suggestions regarding to the finding of this research

A. Conclusion

Based on the results of data analysis, it can be said that the use of the Elsa speak application as a tool in learning English, especially in practicing pronunciation skills, has received a very positive response from users, especially users who are respondents in this study. This is evident and can be seen from the high percentage of positive responses from respondents in each statement on the questionnaire distributed. even the total of all indicators, the level of positivity of respondents' perceptions reached 93.6% or was at a very good level. Therefore, the researcher concludes that the perception of the use of the Elsa speak application in helping to improve pronunciation skills, especially in individual learning is very good / very positive

A. Suggestion

From the advantages of the Elsa speak application above, especially in individual learning, the researcher would like to provide the following suggestions:

1. For students

For students who find it difficult to learn pronunciation in English and feel inferior when learning together, Elsa speak can be the right solution. where elsa speak can be accessed for free and can help students improve pronunciation skills. elsa speak also itself can increase interest and support the learning style of the digital generation. Technological advances that are increasing very rapidly can be utilized as one of the learning media, which is a means to bridge the relationship between students and learning resources, both in the form of educators and other learning resources, one of which is the elsa speak application itself.

2. For researchers

It is suggested to other researchers to complement this research by conducting other research on the use of Elsa Speak in improving pronunciation skills in English language learning in order to increase students' interest in learning English. Based on the description above, the researcher would like to suggest to other researchers, so that the results of this study can be used as an additional reference for further research with different samples and times. This study has many limitations and further research needs to be done on this topic.
